

Bulk Flex Pvt Ltd

Quality | Commitment | Integrity

Flexible Intermediate Bulk Containers (FIBC)

Bulk Flex is a vertically integrated international company with an advance approach to providing high quality products and reliable service making it a well-renowned member of the FIBC industry.

In addition to possessing expertise to manufacture FIBCs that meet the specific requirements of our customers, we have developed and installed sophisticated quality control measures that has shaped the long-standing confidence in our customers across the globe.

We oversee every intricate aspect of our products, from material fabrication, product design, bag construction, quality testing, to shipping and distribution, all tied in with our unparalleled customer service.

Manufacturing Excellence

We at Bulk Flex have invested all our efforts at developing a cost-efficient quality control program based on decades of experience. Critical quality check points and 100% final inspection of the product results in defect-free products yielding greater cost saving for the customers.

Bulk Flex is constantly examining new ways to supply products that are better and safer for our customers. Monitoring the entire manufacturing process from start to finish is one way we have succeeded in achieving higher quality and cost savings that we pass on to you, the customer.
